Fertility lubricant

When to use

Insert a maximum of 15 minutes before having sex.
(The optimum result is achieved in the fertility window)

Dosage form

A tube containing 4 grams of Lumista® gel along with an applicator

Ingredient	Amount	
	mg per tube	DV
Sodium Hyaluronate	36	*

*Daily value not established.

Other ingredients: Dibasic Sodium Phosphate, Monobasic Potassium Phosphate, Sodium chloride, Sodium Hydroxide

INDICATION

Maintains sperm movement

Lubricates vagina

MECHANISM

Lumista® creates a pH-balanced, isotonic environment and has a light texture.

When administered intravaginally, it makes an optimal condition for sperm survival.

Maintaining sperm health and movement elevates the chance of success for couples trying to conceive. The lubricating properties of Lumista® facilitate sexual intercourse as well.

ADVANTAGES

- Ease of administration
- Vaginal moisturizing property
- Without systemic adverse effect
- Lower infection risk compared with oil-based lubricants
- Lower fungal infection risk due to lack of glycerin
- Paraben-free
