

# PEAlyte®

Enhanced Palmitoylethanolamide  
With LipiSperse™

Category	How to use	When to use
Pain & inflammation relief mood & sleep support	One capsule once or twice daily	Any time of the day

## Indications

- Helps reduce pain and inflammation.
- Helps improve mood and sleep.
- Provides neuroprotective effects.

PEAlyte® contains enhanced Palmitoylethanolamide (PEA) with the LipiSperse™ delivery system, providing increased absorption and serum concentration of PEA.

## PEAlyte helps improve:

### Chronic Pain

Pain relief in the context of a broad spectrum of chronic pain, including neuropathy, osteoarthritis, and joint pain

### Migraine

Reduction of pain and need for rescue medication use

### Cognitive Function

Improvement of memory and increasing BDNF\*

### Major Depressive Disorder

Improvement of symptoms adjunctive to antidepressants

### Sleep

Reducing sleep onset latency and time to feel completely awake, improving cognition on waking

### Inflammation

Reducing inflammatory markers in viral infections and improving allergic rhinitis symptoms

\* BDNF: Brain-Derived Neurotrophic Factor (a key protein associated with improving memory, learning, and cognitive function).
